

# WEM Bond Ladder

as of 31.12.2025

<b>Asset class</b>	<b>Currency</b>	<b>Horizon</b>
<b>Bonds</b>	<b>EUR/USD</b>	<b>1+ years</b>

## Strategy overview

The WEM Bond Ladder Strategy invests across treasuries, investment-grade, and high-yield bonds with staggered maturities. This highly customizable approach provides investors with predictable income, flexibility, and effective risk management. By diversifying across bonds with different maturity dates, the strategy reduces interest rate risk while maintaining liquidity through periodic bond maturities. As bonds mature, proceeds can be reinvested into higher-yielding securities in rising rate

environments, while longer-term bonds in the ladder secure higher yields when rates fall. This steady, disciplined process ensures regular income through interest payments, mitigates reinvestment risk, and adapts to changing market conditions over time. Ideal for conservative or risk-averse investors, the WEM Bond Ladder Strategy offers a tailored solution for achieving goals such as retirement income, capital preservation, or funding future expenses, while balancing stability and growth potential.

## Dollar-denominated:
